Diksha Chauhan

AI Automation Engineer

Email: dikshachauhan9201@gmail.com | Phone: +91 9217682198 | LinkedIn: linkedin.com/in/diksha-chauhan-465559403 | Portfolio: https://diksha-ai-portfolio.vercel.app/

PROFESSIONAL SUMMARY

AI Automation Engineer focused on designing and building practical workflows using n8n. Built 50+ automation workflows involving API integrations, webhooks, data processing, AI services, and business process automation. Also experienced in building responsive websites and connecting digital experiences with automation systems.

TECHNICAL SKILLS

- Workflow Automation: n8n, Make.com, workflow orchestration, triggers, conditional routing, workflow validation
- APIs & Integrations: REST APIs, webhooks, HTTP requests, JSON data handling, API connectivity
- AI & LLM: AI-assisted workflows, LLM integrations, structured outputs, prompt-driven automation
- Databases & Storage: Supabase, spreadsheets, structured record storage, data mapping
- Web Development: React, JavaScript, HTML, CSS, responsive web design, landing pages, portfolio websites
- Reliability: debugging, validation, logging, error handling, fallback strategies

PROFESSIONAL EXPERIENCE

- Built and refined 50+ automation workflows using n8n and Make.com for lead intake, notifications, scheduling, routing, and AI-assisted decision flows.
- Connected APIs, webhooks, and data sources to move information across business processes, validate required fields, and handle edge cases and exceptions.
- Developed responsive website experiences and digital interfaces that connect user actions to automation workflows and practical business outcomes.

SELECTED PROJECTS

- AI Lead Qualification System — Classified inbound leads and routed the right follow-up path using webhook intake, AI classification, and automation logic.
- AI WhatsApp Chatbot — Connected incoming messages to intent processing and contextual responses, enabling a faster review and response flow.
- Appointment Booking Automation — Coordinated intake, validation, scheduling, confirmations, reminders, and follow-up steps across communication and calendar tools.
- Form Submission Automation — Validated incoming data, stored structured records, and triggered notifications for the correct next step.

EDUCATION

- Education: Verified academic details to be confirmed before formal submission.

CERTIFICATIONS

- Certifications: No verified certifications were identified in the current project materials available for this profile.
